Getting Serious About Prevention 2017: Improving Cardiovascular Health Together

Manchester

9 February 2017

- feedback to my team and make sure everyone is implementing the key messages with each and every client
- Use learning to engage better with primary care.
- Feedback to my colleagues & use towards service development to reduce cardiovascular risks & risks of limb loss secondary to diabetes & peripheral vascular disease.
- I came to today's event with limited awareness of the projects and initiatives being carried out outside of general practice in relation to health checks. Following today's event I will read up on healthy living pharmacists and the work being carried out by optometry as well as AHPs. Moving forward I will consider a wider range of stakeholders when considering future commissioning and opportunities for health promotion.

- Focus on improving follow up: with emphasis on improving management of increased cvd risk including working between public health and Ccg medicines management and public to increase stating prescribing as this is an error we are particularly low on. The microsimulation model from Cambridge clearly demonstrated these benefits.
- Persuade my mother to have her NHS health check!
- Interrogate local data to identify who is attending health checks
- Include take home messages within training for health check providers
- I want to work with our local hospital to find a way to fund NHS Health Checks for their staff
- To deliver health checks and plant the seed of change in the patient

- Explore implementing the new delivery designs for the population
- Share the learning with the regional DPH network and the regional NHS Health Check network. Inform the commissioning of the NHS Health Check local programme.
- Approach our local ophthalmology board
- Scope delivery of health checks in our outpatient physiotherapist services
- Engage better with primary care now that I understand issues better
- Push for better data
- Think about contacting physio and optical services about potential partnership
