	9. Appropriate follow-up for all if CVD risk assessed as ≥ 20%	7	5	71.4%
Throughout	10. Confidential and timely transfer of patient identifiable data (Not applicable in Oxfordshire)	0	0	
	Total:	94	87	92.6%

Phase 2: Data Compliance vs. National Programme Standards (relates to SNOMED Code data and activity in 202X/2X)

Phase 2 completed on: 21/10/202X

NHS Health Check Pathway Point	Description of Compliance Measure
Invitation and Offer	**1. Identify the eligible population and offering an NHS Health Check** ● Those that received a Check but no invite was SNOMED coded in their clinical notes
The Risk Assessment	**3. Ensuring a complete NHS Health Check for those who accept the offer is undertaken and recorded** ● % SNOMED Code Data compliance vs. mandatory information / measurements required as part of the patients Risk Assessment ● Aim to achieve 100% SNOMED code data compliance ● Data taken from SNOMED codes within the NHS Health Check template on the clinical system used (EMIS/SystmOne) ● A Service Users smoking status is defined as smoking tobacco, vaping status is excluded from this definition. ● All Service Users attending thjeir NHS Health Check to have Dementia Awareness raised with them. ● An incomplete Risk Assessment may lead to an inaccurate calculation of the patients risk score and therefore have clinical implications
Risk Management	**7. High quality and timely lifestyle advice given to all:** ● Smokers: Aim to offer 100% brief advice and signpost/refer 100% ● Obese: Aim to offer 100% brief advice and refer 100% ● Inactive: Aim to offer 100% brief advice and signpost/refer 100% Alcohol: Aim to offer 100% brief advice to patients requiring a full AUDIT
	8. Additional testing and clinical follow-up: ● Diabetes: Offer 100% a HbA1c blood test if Blood Pressure ≥140/90 mmHg or BMI ≥30 (or ≥ 27.5 when adjusted for ethnicity) ●Hypertension: Offer 100% a hypertension assessment if Blood Pressure ≥140/90 mmHg ● Chronic Kidney Disease: Offer 100% a serum creatinine blood test for a CKD assessment if Blood Pressure ≥140/90 mmHg
	9. Appropriate follow-up for all if CVD risk assessed as ≥ 20% ● Record of statin offered, accepted and declined
